Chris Havens  
Project Manager  
Gaylor Electric, Inc.  
5209 Linbar Dr., Ste. 600  
Nashville TN 37211

Dear:

I would like to take this opportunity to recognize the Gaylor Electric team for their performance on the Scott Hamilton Center for Proton Therapy in Franklin, TN.

Gaylor Electric's attention to detail, craftsmanship, and professionalism are just a few of the qualities showing why they are widely known as one of the country's premier electrical contractors. Their ability and commitment towards delivering a quality product in a fast and safe manner makes Gaylor stand above their competition.

Utilizing 3D BIM modeling and prefabrication, Gaylor proposed and executed a strategy to prebuild large modular sections of conduit built in their prefab center. When areas of the building were ready, Gaylor would crane the modular assemblies into place, saving time with the installation to enable Merit to meet its concrete pour schedule.

Gaylor places a strong emphasis on safety and the implementation of protocols above industry standards allowed them to complete over 30,000 field hours with no first aid or recordables. Their ability to coordinate with other subcontractors helped create an environment of cooperation and success. Gaylor also demonstrated great poise and flexibility as we worked through last minute schedule and design changes.

Gaylor's commitment to the customer, use of technology, craftsmanship and safety have made working with them an enjoyable experience and we look forward to working with them on future projects.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Shannon Sapp', is written over a light blue circular stamp.
