RE: Philip Simmons High School – Charleston, SC

Dear Logan,

I am writing this letter to thank you and the Gaylor Electric team for a job well done on completing the Philip Simmons High School project in Charleston, SC. Your team showed dedication to safety, quality, and coordination in completing the electrical scope at Philip Simmons High School.

As with all projects, difficult issues arose, but the Gaylor project team was able to prioritize the tasks at hand, and push to complete the project on schedule. Gaylor's safety culture was also extremely evident throughout the duration of the project, with an emphasis on safety from the top level of management down to the helpers in the field. A true safety culture is no accident, and it was seen as a clear priority for Gaylor. The quality of installation was also a stand-out aspect of your team's time at Philip Simmons. Conduit runs were installed straight and level, wiring in panels was neat and organized, and your coordination with other trades was exceptional.

Again, thank you to you and your team for the efforts expended in completing the Electrical Scope at Philip Simmons High School, and we hope to work with you and your team in the near future.

Sincerely,

E. Grant Story
